Connect your Selfly fridges in 4 steps

About 10 minutes. You need your Selfly Cloud login.

What we require

1

Organisation name

You find it in Selfly Cloud

2

The code of each fridge

You find it in Selfly Cloud

3

API access

Selfly sends it after one email: client ID and secret, API user and password, access key

Step 4 is where you enter them. Nothing is sent to us by email.

1

Write down your organisation name

Log in to **cloud.selflystore.com**. It is in the top right box.

2

Write down each fridge's code

Device Management › your fridge › Control Panel › Refill QR Code

The code starts with **if-**. Not the long number on the left.

3

Ask Selfly for API access

Copy this email, add your organisation name and fridge codes, send.

To: support@selflystore.com
Subject: API access for PickVend

Hi Selfly team,

Please enable API access for our organisation, so we can connect our fridges to delivery apps through PickVend (pickvend.com). We need the client ID and secret, an API user that can read stock and open the door, and the application access key on our fridges.

Organisation: [from step 1]
Fridge codes: [from step 2]

Thank you,
[your name]

4

When Selfly replies, paste it in your PickVend portal

Open your portal link, paste everything, press **Test connection**. Green means done.

Never email passwords to anyone, including us.

Stuck? Email hello@pickvend.com with a screenshot.
